

Gen-X Series: RAD 15DX Extreme Duty – Powerful - Industrial Pneumatic Torque Wrench

Part No.	Tool Model	Drive Size	Torque (Low –High)	RPM	Weight	Noise Level
17328	RAD 15DX	1 in.	300 – 1500 ft/lbs.	10	8.6 lbs.	80db

Accuracy of +/- 4%, Repeatability +/- 2%

Highest Power-to-Weight ratio of any power tool

All RAD® torque guns are designed to deliver the highest power-to-weight ratio of any pneumatic torque tool on the market today, saving you time and money in maintenance or production costs.

Accuracy +/- 4% - Repeatability +/-2%*

To ensure measurement, accuracy and joint integrity, every RAD® air torque wrench is individually calibrated and traceable to NIST standards. Our tools are many times more accurate than impact wrenches. *With correct air supply.

88 times less vibration than impact wrenches....operates at only 80db

RAD® torque guns are one of the safest power air tools on the market today. Our exclusive low profile reaction arm takes virtually all the operational load off the operator, reducing injuries and greatly reducing operating costs.

Each RAD® pneumatic tool includes a standard reaction arm with retaining ring, 12' hose & fittings, and a regulator tool holder.

Corresponding Reaction Arms for the RAD 15DX Torquing Wrench				
				
Standard (comes with tool) Part No. 17375	Deep Socket Part No. 18480	Double Ended Arm Part No. 19094	Blank Part No. 17888	Double Ended Blank Part No. 19093

If you do not see a Reaction Arm on this chart that fits your needs, call us at 888-315-0175. We can design a Custom Reaction Arm specific to your bolting application.
